Colours and finishes

Exterior panel finishes: The standard Conker exterior colour is gloss white, but other exterior colours, in matt or gloss finishes, are available.*†

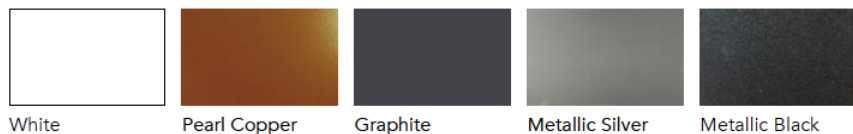

Interior panel finishes: The standard Conker interior colour is white. However, we have put together a small range of interior paint colours for you to choose from, in case you want something more cosy.

Of course, you can decorate your Conker with any colour scheme you desire, we will simply supply the interior panels as unfinished plywood for you to prime and paint as you wish.

Powder-coated finishes: We have a range of standard gloss colours available for interior fittings, such as the kitchenette and benches.

If you want something different to go with your own colour scheme, we can arrange that for you using paints from the RAL Colour Selection range.*

Flooring: The floor of your new Conker is made of unstained hardwood-faced ply. This is ready for you to stain or paint, or is a perfect surface on which you can fit laminate/wood flooring, carpet or lino. If you would like for us to supply your Conker fitted with your choice of flooring, we can do that too.*

Upholstery: All our fabrics are extremely hard wearing and meet all the current UK fire-safety regulations. A range of fabrics, in a variety of finishes, is available on request.

* Price on request. † Further exterior colours available. M matt finish G gloss finish

What's in the box?
