

PRESIDENT BUILDINGS OFFICE PARK

President Buildings is a high-quality office park offering individual office units from 1,000 sq ft up to 9,500 sq ft. It is situated between Sheffield City Centre and the M1 motorway in the Don Valley area of Sheffield. The park was created by the refurbishment of part of the original steelworks office complex and the subsequent construction of new offices to the rear. The office park comprises 28 individual units set around a landscaped courtyard which provides extensive parking areas for the office occupiers.
